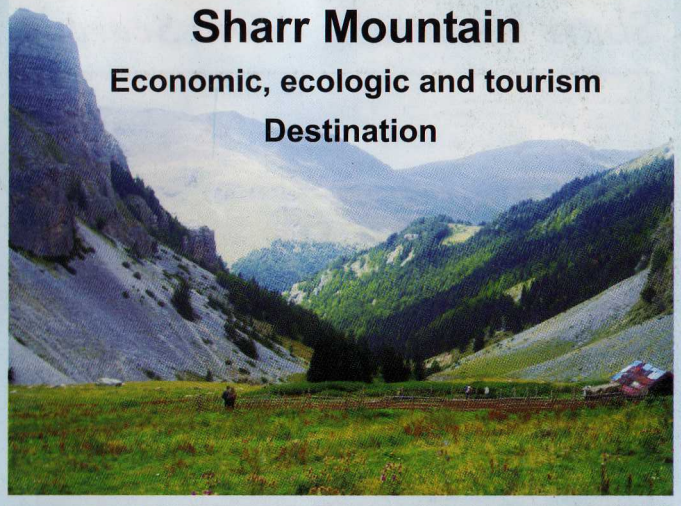
Sharr Mountain

Economic, ecologic and tourism Destination



Sharr Mountain - Mont Scardus

Mountains which are with 80 km lengthwise and with 10-20 km breadthwise are part of Sharro-Pind mountain chain. Shar Mountain represent highest top of the mountains in the Balkans.

Extends from Korab Mountain to the Lepenc (outfall of Kaçanik) and among mountains Kalabak and Koritnik, with general surface around 1607 km2.

Sharr is the highest mountain and most expressed in vertical way not just in Macedonia but in entire region of the Balkans, which represents a erosive surface with height around 2000-3000 m in which are raised a sufficient number of the tops: Luboten (2528 m), Vraca (2528m), Kobilica (2528m), Black Top (2554), Big Turk (Tito`s Top 2474m), Little Turk (Turk`s Top 2702 m), Rasengjul (2383 m) etc.

This high and extended mountain is enriched with different hydrographical phenomenon:

A large number of water resources, clean stream, straight alps rivers, waterfalls and cataracts with marvelous splendor, extraordinary splendid "Eyes of Sharr" (glacial lakes).

The longest river of Sharr is Shkumbin (36.8 km), Mazdraça (24.3 km), River of Bogovina, Bistrica, rivers of Vejca, Kamnjani, Leshka etc. In Sharr Mountain has totally 39 glacial lakes (27 in Macedonia) 25 permanent and 14 temporary (in Macedonia 19 permanent and 8 temporary) are located in elevation from 1820m to 2440 m). The most known are lake of Karanikolla (Big Xholi 26240 m2), White lake (18000 km2), Black lake (33520 m2), Lake of Bogovina (66880 m2) etc.
